- 5 PROGRAM IMPLEMENTATION & MIGRATION
- 6 STRATEGIC MARTECH INTEGRATION FOR CRM SYSTEMS
- 7 MANAGEMENT & TRAINING OF IN-HOUSE PROFESSIONALS

Conferences We Look Forward To In 2023

CRM PLATFORMS THAT OUR CLIENTS USE

RESULTS WE'VE DELIVERED

Case Study 1: Average Check Segmentation

The Challenge:

Our quick-service/beverage client wanted to increase their customers' spending.

The Solution:

We targeted customers in 3 spending brackets with special offers that incentivized higher spending, with a custom threshold for each bracket.

Why This Worked:

Each bracket was incentivized to spend a few dollars more than they usually would, which made the purchase more within reach.

The Results

+35%
Increased Customer Spending

Revenue:
+\$40,000
Net Sales

Case Study 2: Spend & Frequency Challenge Campaigns

The Challenge:

Our fast-casual client wanted to challenge their guests to visit more frequently and to spend more.

The Solution:

We targeted guests in 5 different spend brackets (between >\$8 and <\$30) asking them to make two visits in two weeks. Spend minimum and reward levels were custom for each segment.

The Messaging:

We used the Challenge Module in the white-label Punchh app to communicate the Challenge. The guests were able to track their progress in the app and received Push Notifications to mark completion of each stage.

Why This Worked:

By targeting different spend brackets, we made the challenge more achievable for all targeted guests. We learned also that guests in lower spending brackets tend to visit more often, hence the frequency challenge appealed to them more.

The Results

+24%
Increased Customer Spending
for lower spend brackets

51%
Reward Redemption Rate
for lower spend brackets

2.6X
Visit Frequency
during active campaign period
for lower spend brackets
